THE DAILY NEWS.

O for one hour of such enchanted light as made a fairer 'sytime in the sky, When on the willow-bank we sat that night, My old-time love and I!

A while we taked so low and tenderly. We felt the istening trees above us lenn; And louder for the sclence seemed to me That fell at last between.

Her heart lay floating on its quiet thoughts, I the water lilies on a tranquit lake; And Love within, unknown, because unsought, Lay dreaming half awake.

Ab, Love is lightest sleeper ever known! A whisper, and he started plain to view; Old as the heavens seemed our story grown, While yet the moon was now.

And when she spoke, her answer seemed the while Sweeter for sweetness of the lips that told, Betting a precious word within a smile— A diamond ringed with gold.

Then bloomed for us the perfect century-flower; Then filled the cap and overran the brim; And all the stree processionsi, that hour, Chanted a bridal hymn.

Ab, Time, all after-days may fly away, Such joy as that thou hast but once to give, And Love is royal from his crowning day, Though hugdomless he live.

DARBY'S PROPHYLACTIC FLUID.

Ictter from Hon. Alex. H. St phens, of Georgia.

(RAWFORDSVILLE, Ga September 29, 1868)

Darby's Prophylactic Finid is an article of little cost, but great value. Its domestic as well as medicinal uses are numercus, while its specialises are most wonderful. I have not been without it for ten years, and no head of a samily who can afford to have it should be without it.

ALEX. H. STEPHENS.

THE WONDERFUL FAMILY MEDI.

Letter from the Surgeon-General of the late Confederate States.

RICHMOND, Va., January 14, 1869.

JOHN DANBY & Co., No. 160 Wilham-street, New York:

Gentlement Laws reported your letter of the Lither JOHN DARBY & CO., NO. 160 WHINAM-SIREST, New York:

Gentlem-n—I have received your letter of the 15th of December, 1866, calling my attention to your (Darby's Prophylactic) Find.

I most cheerfully state that the Fluid was furnished to, and extensively used by, the surgeons in charge of general hospitals in the Confederale service with great benefit to the patients—all the surgeons making a favorable report—a great deal of it was used in the hospitals.

Very respectfully, your obedient servant, SAM'L PRESION MOORE, M. D, STEAM BIBBS AND STOP COCKS, STEAM

THE ASTONISHING

DISINFECTANT. EMORY COLLEGE, GYFORD. GA., December 28, 1868.

Prof. DAIRJ. Dear Sir—Having not been engaged for many years in the active duties of the Medical profession. I am only superficially acquainted with the claims of your Prophylactic Fluid, but am well acquainted with its chemical elements.

While, therefore, I cannot speak experimentally of the value of the compound yet the disinfecting and therapeutic properties of the agents employed in its composition, together with the well known reputation of its discoverer, as a chemist, authorize me to regard its merits as of a high order; on the whole it must be considered as a valuable contribution to the class of articles to which it belongs.

These views, I may add, are sustained by the testimony of many competent judges, who have tested its properties.

Elieve me, dear sir.

Yours, respectfully.

As a disinfectant and remedial agent too, when indicat d, it is not excelled by any similar preparation. We use permeanganic preparations very extensively in this hospital, and could not do without them. I consider yours the best and most elegant preparation of the kind manufactured.

Respectfully yours, &c.

P. BRICE, M. D.,
Sup't and Physician Alabama Insane Hospital.

FROM WBICH MANKIND SUFFER over a large part of the globe, is the consequence of a diseased action in the system, induced by the poisenJose miasm of vegetable dcay. This exhalation is evolved by the action of solar heat on wet soil, and rises with the watery vapor from it.—
While the sun is below the horizon this vapor lingers near the earth's surface, and the virus is taken with it through the lungs into the blood. There it acts as an irritating poison on the internal viscers and excreting organs of the blood. The liver becomes torpid and fails to recrete not only this virus, but also the bile from the blood. Both the virus and the bile accumulate in the circulation, and produce vio ent constitutional disorder. The spleen the kidneys, and the stomech sympathize with the liver, and become disordered also. Finally, the institut of surrorganism, as 1 in an attempt to expel the noxious infusion, concentrates the whole blood of the body in the internal excreteries to force them for the surface, and runbes to the contral organs with conjective violence. This is the Chil. But in this effort it sale. Then the Fever follows, in which the blood leaves the central organs and runbes to the surface, as if in another effort to expel the irritating poison through that other great excretory—the shin. In this also it fair, and the system abandons the attempt exhausted, and wits for the recovery of strength to repeat the hopeless effort another tay. These are the fits of paroxyams of Fever and Ague.

"We have lacored to and, and have found an anti-

Which neutralizes this malarious poison in the bood, and stimulates the liver to expel it from the bood, and stimulates the liver to expel it from the bood. As it should, so it does cure this afflicting disorder with perfect certainty. And it does more, or rather does what is of mere service to those subject to this infection. If taken in season it expelse it from the system as it is absorbed, and thus keeps those who use it free from its attacks; keeps the system to me health although exposed to the disease. Consequenti, it not only runes, but protects from, the great variety of affections which are induced by this malignant influence, such as Kemittent Fever, Chill Fever, Dumb, or Masked ague, Periodical Headache, or Billous Beadache, Billous Fever, reuralgia, Rheumatism Gout, Billouse Fever, reuralgia, Rheumatism Gout, Billouse Faralyse, and rainful affections of the pleen, Bysterics, Cohe, Paralyses, and rainful affections of the pleen, Bysterics, Cohe, Paralyses, and rainful affections of the Blomath and Ecwels, all of which, when arising from this cause of these derangements and cares the disease.

This it accomplishes by stimulating the carefories to expel the virus from the system; and these organs by degrees become habited to do this, their affect, and with safety. We have great re son to believe his is a surer as well as asiar remedy for the whole class of diseases which are cause d by the missoner, and with safety. We have great re son to believe his is a surer as well as asiar remedy for the whole class of diseases which are cause d by the missoner, and which seems the property of the whole class of the season which are cause d by the missoner of the public, which is, that it is cheap as well as good.
